

The Town and the City

Teenage Fanclub

Feels good to be here again
In the cool air and the driving rain
In the first light that morning brings
High five to future things Chance is waiting
Just outside the door
Arrange the space
'Cos change is heading here for sure If you can't see it right away
You've got to listen, you've got to listen
Don't just walk away
Listen for what you're missing, this light feels alright The high rise in the setting sun
Progress that has just begun
The new life that tomorrow brings
High five to future things Motion stopped the wheels
From turning round
Silence called but I've been tangled
Up in sound If you can't hear it right away
You've got to listen, you've got to listen
Don't just walk away
Listen for what you're missing, this light feels alright
