# Parasite

## Ed Kowalczyk

Little worm
No spine at all
Just feedin' on the crumbs that fall
Down on the floor you grub
An ancient slug
Is far from above
How you live with yourself?
Big mouth
Little heart
Talk so loud, think your smart
You're just a bag of guts
And nothing but
The door is shut
This wall ain't coming downYou want what you can't be
Just a parasite suckin' on the side of me
I'm gonna rip you off
And smoke you out
Your time is done here you won't be bringin me down againThis time, the doctors here
To diagnose to make it clear
No quarter be given to the enemy
The parasite
Was livin' off of me
Now that I am healed
The world is right the way is clear
All of the weakness gone
It won't be long 'til I am strong
'til I am strong againYou called yourself my friend
Shoulda never let you in
Now many are my sins but I'm no parasiteI woke up I came to understand it was always you
Takin my power down
The cause was found the truth is out
That dog is in the poundYou want what you can't have
I'm the healthy skin under
You're the puss and the scab
Gonna rip you off and throw you out
Your time is done here you won't be bringin me down again
