

Live Together

Lisa Stansfield

This is all we need, to be free
To understand, and find the answer
So let's do it now, let's do it right now We've got to live together, if we're gonna be free
We've got to find the answer, right now
We've got to live together
We've got to see each other, for whatever we are
We've got to solve the problem, together
We've got to live together Take a look at me, I'm the honest kind
When I say it I mean it, I swear I need you, all my life
All we need is sympathy, if we want to change our minds
This is no second thought, this is for all times, all my life This has got to be forever
Whatever, whatever's come, whatever's been
It's livin' life for what we see, promise not to lose our hope We've got to live together, if we're gonna be free
We've got to find the answer, right now
We've got to live together, we've got to live together You don't need no reason to hold your head up high
A little pride so you can justify your whole life
This has got to be forever
Whatever, whatever's come, whatever's been
Livin' life for what we see
Promise not to lose our hope We've got to live together, if we're gonna be free
We've got to find the answer, right now
We've got to live together
We've got to see each other, for whatever we are
We've got to solve the problem, right now
We've got to live together, live together We're gonna give it all that we got
We'll believe it whether or not
Lovin' ourself and loving our hearts
Love is seein' all that we are
We're gonna do it, do it right now
Love is there, it's showin' us how
We can do it, we can live together Just take a look at me, I'm the honest kind
When I say it I mean it, I swear I need you all my life
All we need is sympathy, if we want to change our minds
This is no second thought, this is for all times, all my life When this has got to be forever
Whatever, whatever's come, whatever's been
Livin' life for what we see
Promise not to lose our hope We've got to live together, if we're gonna be free
We've got to find the answer, right now
We've got to live together

We've got to see each other, for whatever we are
We've got to solve the problem, together
We've got to live togetherWe're gonna give it all that we got
We'll believe it whether or not
Lovin' ourself and loving our hearts
Love is seein' all that we are
We're gonna do it, do it right now
Love is there, it's showin' us how
We can do it, we can live togetherWe're gonna give it all that we got
We'll believe it whether or not
Lovin' ourself and loving our hearts
Love is seein' all that we are
We're gonna do it, do it right now
Love is there, it's showin' us how
We can do it, we can live together
