

Attached At The Hip

CKY

failed attempts have turned us into one pathetic twisted wreck
all is eerie, you're standing near me
I feel you breathing down my neck you don't need to be so shallow
turn your head prepare to follow deep incision operation
the tortured one becoming two
involuntary, solitary
it's nice to have a point of view dependency
separate we never will be
attached at the hip to me
separate we never will be
when there's no privacy
separate we'll never be seen
attached at the hip to me
(attached at the hip to me, attached at the hip to me)
a part of my anatomy you don't need to be so shallow
turn your head prepare to follow have you ever seen another lying in a pool of blood? separate we never will be
attached at the hip to me
separate we never will be
when there's no privacy
separate we'll never be seen
attached at the hip to me
(attached at the hip to me, attached at the hip to me)
a part of my anatomy
