All I Need

Cool Ethan

Sucked in and held fast tightly
Ive been running toward the things that wake me nightly
Night out and night in
Breathe out but dont you dare breathe in
Its heating up baby
Things are steaming up babyJust throw it all away
You just get so bent out of shape
Sometimes I think that you should take
A moment to look aroundBe what you've longed to be
And Ive got all I need
The world wont wait for me
So Ill just take my timeYour words dont take a toll
And now just so you know
You wouldn't believe me
If I told you to your face
Lets make em say: do do do do do do doSucked in and held fast tightly
Ive been thinking that maybe you and me could take some time off
Lying under covers, acting like this really matters
Well watch the sunrise baby
Open your eyes, babyJust throw it all awayBe what you've longed to be
And Ive got all I need
The world wont wait for me
So Ill just take my timeYour words dont take a toll
And now just so you know
You wouldn't believe me
If I told you to your faceAnd dont think I dont get scared
Youre not the only one
The only way I know how
Ill take things as they come
And Im not saying Im not unsure
But so is everyone I knowBut tonight...If tonight was a different night
Today was a different day
I would just pack it up
And I would be on my way
Do you think that anyone knows what its like to be so cliche?Be what you've longed to be
And Ive got all I need
The world wont wait for me
So Ill just take my timeYour words dont take a toll
And now just so you know

You wouldn't believe me
If I told you to your face
Lets make em say: do do do do do do do do
