

Talk To Myself

[Avicii](#)

Alone searching for devotion, and the fading melody
So trying to cross an ocean, and I won't bare to leave
Locked up my, who know what I try to say
My heart all the time was stolen, begging for a treat
Some nights I talk to myself
I said the words that I can't say to no one else
And some nights I talk in my sleep
I said the words I never said when you were with me
Some nights I talk to myself
I said the words that I can't say to no one else
And some nights I talk in my sleep
I shout the words I never said when you were with me
I'm gone, love has got me open, love is insanity
So long words I left unspoken, I couldn't set them free
Won't sure the love [?] [?] going on the thing
My heart, I left it for broken, [?]
Some nights I talk to myself
I said the words that I can't say to no one else
And some nights I talk in my sleep
I said the words I never said when you were with me
Some nights I talk to myself
I said the words that I can't say to no one else
And some nights I talk in my sleep
I said the words I never said when you were with me
Some nights I talk to myself
I said the words that I can't say to no one else
And some nights I talk in my sleep
I shout the words I never said when you were with me
OhOhOh
