

# Someone Else's Song (Demo)

Wilco

Well I can't tell you anything  
You don't already know  
I keep on trying  
I should just let it go I keep on singing  
Your eyes, they just roll  
It sounds like someone else's song  
From a long time ago You already know the story  
And the chords are just the same  
You already know I love you  
And I sound like what's his name But you can't stop me  
I want you to know  
I know it sounds like someone else's song  
From a long time ago
