Astronaut

Duran Duran

Makes my hair stand up on end
Something alien happenin'
Synchronize but don't comprehend
'Coz where I stop that's where you begin
Another moment I commit,
A pleasure as I'm gonna' take the hit,
And I'm addicted to the state you're in,
'Coz you're getting me out of it!
Wasted
There's nothing gonna ace this,
And were gonna go to space it,
'Coz I'm leaving with an astronaut
Grooving out to X ray specs'
Something tells me you're the alien sex
I can't imagine now what comes next
When this astronaut connects
Coming on when I touch your skin
A kind of strange light you emit
I feel your gravity pull me in
Now you're getting me out of it
Wasted
There's nothing gonna ace this
And were gonna go to space it
'Coz I'm leaving with an astronaut

Wasted
There's nothing gonna ace this
And were gonna go to space it
'Coz I'm leaving with an astronaut
They're feet for quantum leap
Because space is hard and deep
And we follow giant footprints
As we fall in falling like the twins
Through Saturn's holy rings
And if they can't hold us
Where it's gonna end up
Anybody knows
Wasted
There's nothing gonna ace this

And were gonna go to space it
'Coz I'm leaving with an astronaut
Wasted
There's nothing gonna ace this
And were gonna go to space it
'Coz I'm leaving with an astronaut
An astronaut
An astronaut
An astronaut
