

veg

Will Haven

Advisory - the following lyrics contain explicit language:

Head to toe draped in your skin
Needless death, where's your compassion
Why can't you see while stabbing your meat
That you don't need to kill And still we keep killing
And still we keep killing Taken from or bought from farms
Locked away in labs which our taxes pay
Scared and frightened awaiting the next test
They need a voice, a voice that liberates And still we keep killing
And still we keep killing
And still we keep killing From factory farms to your dinner table
You need your protein, do you eat your vegetables?
And you deserve a break today
Are the lies, are the lies And still we keep killing
And why are we killing
Killing ourselves
