Inside Your Mind

Ryan Cabrera

Would you follow me tonight
Find what the world has for us inside
So many places and ways its all around for us to find
Just close your eyes and dream
He's all you need(chorus)
Life
It sails down the ocean
It can swallow the hills of love
But you don't have to see to knowTime
It can fly with the wind, I
Imagine the world above
And it's all inside your mindDon't you worry you're not alone
Maybe there's hope that you didn't know
With one on the way is clear
Now it's time for you both to grow
Just close your eyes and dream
Of the endless possibilitiesLife
It sails down the ocean
It can swallow the hills of love
But you don't have to see to knowTime
It can fly with the wind, I
Imagine the world above
And it's all inside your mindThere's a place that's hiding deep inside a world that's right there fighting
In all our lives
And there's a place we all can find
No hill too steep
No ocean's too wide
In all our livesLife
It sails down the ocean
It can swallow the hills of love
But you don't have to see to knowTime
It can fly with the wind, I
Imagine the world aboveAnd it's all inside your mind
And it's all inside your mind
