

Overturned

Heather Nova

On a flight path out of Berlin
I had a sense what I was falling in
I caught the light refracting from your eyes
On the runway below making me blind
I had a hurricane warning in my chest
Listening for the voice that knows me best
It's all so simple and so true but I'm so slow to learn

Yeah you've got me

I 'm in your world

Caught in your sunset

Overturned

So I put down in Nova Scotia
In the pine tree sun I could smell the ocean
I was trying so hard not to remember
Washing it clean in the icy water

But the energy I can't resist

And when the fog rolls in I think of your kiss

So I light a fire to stare into

But love's so slow to burn

Yeah you've got me

I 'm in your world

Caught in your sunset

Overturned

Well some will say that nothing lasts forever

And some will say it's better to be safe

I don't care; I'll stay with you whatever it takes

Yeah you've got me

I 'm in your world

Caught in your sunset

Overturned
