

Thanatos

Galactic Pegasus

So thin my paper Thanatos
As you sway within a sky
Until you're born again
Stay as light inside an eye

Just your gaze is enough to break off this mask
Shadows fall into light. All life inverted
I can show you, to equal ends, the timeline.
As we all become a part of the miasma

I am Thanatos
I've relieved the sword of smoke
And that makes me a ghost
I am Thanatos
Invisible world where nothing will grow
My Thanatos

Stop waiting for invisible worlds where nothing will grow
Living like your memory wherein nothing grows old

The difference is that
There's no difference

My Thanatos
Invisible world where nothing will grow

You lay on the water
Always at the brink
You never really sink
