

Don't Look Down

[Philip Selway](#)

And as we drift from side to side
We know there's nowhere left to hide Don't let go
I'll catch us when we fall
What we see in the cold light
Can scare us all
All our fears will lessen in time Don't look down, it's fine
It's one of those days
Don't run and hide
Don't look down, it's fine
Don't run and hide Weren't you the one who'd always say
Harsh words won't make this go away
Silence the voice inside my head
Some things are better left unsaid Don't let go
I'll catch us when we fall
What we see in the cold light
Can scare us all
All our fears will lessen in time Don't look down, it's fine
It's one of those days
Don't run and hide
Don't look down, it's fine
Don't run and hide I wake up with a start
And watch you sleep
Waiting for the doubts that comfort me Don't look down, it's fine
It's one of those days
Don't run and hide
Don't look down, it's fine
Don't run and hide
