

Come On Come On

Little Birdy

I got someone on the left of my left side
i got cigarette on cigarette mindful
i got foolish so i took him on home i said ooo ooyou don't need me don't tell me you want me
i i'm over it
you can't have it and that's why you want it
i i'm over it baby if you and me aren't trying
i can't see the point
come on come on
baby if you and me aren't trying
i can't see the point
come on come on i got exorcist on my morning station
a foolish mind giving me my own halo
i am tempted into your living room
i said ooo ooo ooyou don't need me don't tell me you want me
i i'm over it
you can't have it and that's why you want it
i i'm over it baby if you and me aren't trying
i can't see the point
come on come on
baby if you and me aren't trying
i can't see the point
come on come on Coz you and me are holdin'
you and me are holding on
but if time alone, aches and bruises this heart of mine
I will place my weary head and sleep alone baby if you and me aren't trying
i can't see the point
come on come on
baby if you and me aren't trying
i can't see the point
come on come on
