Little Angel

Deathstars

Stand here for me angel
Oh, little child so broken and wild
Bear not life on your shoulders
Just kiss it one last timeWas the music too loud for you
Too raw to be true
Were the abstracts too dark for you
I beg you not to
Watch the sky so bright
See all its light fadeHere I am, was it everything you spoke of
Oh, little angel
Yeah, here I am, was it everything you've dreamt of
Oh, little angelBow down for me, heavenly one
Shed not those tears, my little friend
Fear not God anymore
'Cause you find him in my armsWas the volume too high for you
To touch for the blue
Were desires too dark for you
Too good to be true
Watch the sky so bright
See all its light fadeHere I am, was it everything you spoke of
Oh, little angel
Yeah, here I am, was it everything you've dreamt of
Oh, little angelTell me now how your wings got broken
Tell me now how your spine got whipped by leather
Tell me now how your tongue got split
Tell me all the things you need to drift awayWatch the sky so bright
See all its light fadeWatch the sky so full of light
Oh, little angel
For the last time so bright
Oh, little angelHere I am, was it everything you spoke of
Oh, little angel
Yeah, here I am, was it everything you've dreamt of
Oh, little angel
