

Oxygen Feed

Viet Cong

skeletons in between
tubes for the oxygen feed
signal fire really glows
in the clock radio you can let it burn and fall apart and burn the ground i can only see you where you are
i can only carry you so far to the (slowly?) ebb and flow
forward carefully
when the suns in your eyes
leave your weight behind like the dull human scene?
nods their heads to the piece?
no one knows what they need
said the trembling sea? you can let it burn and fall apart and burn the ground i can only see you where you are
i can only carry you so far, far
so far, so far to the (slowly?) ebb and flow
forward carefully
when the suns in your eyes
leave your weight behind
to the (slowly?) ebb and flow
forward carefully
when the suns in your eyes
leave your weight behind
