

# Starlight

## Electric Light Orchestra

Starlight, I hear you callin' out to me  
Sweet love rollin' across my mind again  
I want you, yes, I do, I need you, yes, I do  
And then you run You gotta stop foolin' around  
Keep your feet on the ground, little girl  
And starlight will shine all around, little girl Starlight, your eyes are lookin' out so far away  
Constellation in the sky is smiling down on me  
I wonder, wonder why  
I can feel you're so real, I can see you're so near  
And the you run You gotta stop foolin' around  
Keep your feet on the ground, little girl  
And starlight will shine all around, little girl  
You had me all the summer long, little girl Moon glow, come light the way up to my window  
As you roll across the night, don't tell nobody that I told you so  
I want you, yes, I do, I need you, yes, I do  
And then you run You gotta stop foolin' around  
Keep your feet on the ground, little girl  
And starlight will shine all around, little girl  
You had me all the summer long, little girl Starlight, your eyes are lookin' out so far away  
Constellation in the sky is smiling down on me  
I wonder, wonder why  
I can feel you're so real, I can see you're so near  
And the you run
