Wake Up

Ninjas With Syringes

Counting nights by the lights that flip by
Guiding tracers past my half opened eyes
Offer again, what's the patience, what is the plan?
Order goes out the door when she walks in

Coming off a blood post and a dream
Lead on by the shieldes before me
Potent answer to an question that's plagued so long
She came in like a storm before the calm-

Wake up wake up wake up move on
Wake up wake up til your whole life's gone
Wake up wake up wake up move on
Give it up when you had it wrong

No swift the lights flash past
I guess my eyes out the window attention gone
I wanna sleep but I can't stop looking
Stay alert til the world slows its spin

She swindled into necessary danger
Lowered my protest into rumor
What's left of what might have been?
Ya flip the record than you drive me mad again-

Wake up wake up wake up move on
Wake up wake up til your whole life's gone
Wake up wake up wake up move on
Waking up when you had it wrong

I'm sorry I'm sorry I'm solid I'm solid
I haven't slept for days
And I can't drink without my eyes watering

Below below below that's not far beneath
How deep to cut through the skin to the bone must one reach?

Awake and aware is only half way there
The sunrise mist stays already here

Wake up wake up wake up move on
Wake up wake up til your whole life's gone
Wake up wake up wake up move on
Waking up when you had it wrong

I Wake up
I Move on
We sang
Your song

I wake up
Then I get gone
Wakin up when your whole life's
Wrong-

I wake up I wake up and I wake the soul
Awake and aware's only half way there-
