

Good Enough

A Telemetry

you can't expect
to get anywhere like that
how can you think
you'll make the grade

when its half done
half ass and half the way there
it doesn't matter to you
slackers don't care

spin me round and round
trim me at the bud
-hit me in the head-

lift me up and down
just to join the club
-as desire fled-

good enough is bad enough
but good enough
is good enough for me

carry the burden
the last straw on your back
carry the interest
trouble finds it hard to fade

when its most tough
most rough and most of all undone
it will loose its since of worth
and keep you on the run

good enough is bad enough
but good enough
is good enough for me

higher levels you can attain
if you power to the grind
lower levels will remain
if you don't listen - don't try

you won't survive

good enough is bad enough
but good enough
is good enough for me
