# Far from Over

## Kids In the Way

I can feel the darkness grow
I can see the North wind blow
But theres a light up aheadSo you want to get the best of me
You better be all that you can be
I got a lot more than you at stake
If its my life you want to takeJust hold on a little longer
These days in the cold will make us stronger
Stand up, stand up, we wont back down
Hold on, theyre coming for us right nowThis emptiness numbs my bones
But the flames melt my soul
And its a fight I can winSo you want to get the best of me
You better be all that you can be
I got a lot more than you at stake
If its my life you want to takeJust hold on a little longer
These days in the cold will make us stronger
Stand up, stand up, we wont back down
Hold on, theyre coming for us right nowTheres nothing that can stop us now, oh, no
Were gonna make it through somehow
Cause you and me, we never go easy
You and me, we never go easyThis night is far from over
But the end is so much closerJust hold on a little longer
These days in the cold will make us stronger
Stand up, stand up, we wont back down
Hold on, theyre coming for us right nowJust hold on a little longer
These days in the cold will make us stronger
Stand up, stand up, we wont back down
Hold on, theyre coming for us right nowJust hold on a little longer
These days in the cold will make us stronger
Stand up, we wont back down
Theyre coming for us right now
