Pretty Face

Longwave

at least you've got a pretty face
so take a chance and join the game
cos nothings gonna bring you down
suffer die and rise alright
so golden glitter afterlife
youre the biggest hit in town
we never saw the brightest star
you know it's shining in the dark
but all you've got is this until you die
it's nothing but a trick that gets you high
your running back to where you know don't stay here going
out of your mind
closer than you've been before
your friends are all the biggest bore
there's nothing like the newest high
listen there's no time to wait
it's up to you don't hesitate
with everything they get you by
they always were your biggest fans
you took them all to your hands
but all they got is this until they die
it's nothing but a trick that gets you high
youre running back to where you know don't stay here going
out of our mind
yeah you die
it's nothing but a trick that gets you high
your running back to where you know don't stay here going
out of your mind
out of your mind
out of your mind
out of your
out of your
