

Review My Kisses

Lara Fabian

I'm only happy when I'm with you
I only feel good when I'm talking to you
And I'm a mess when you don't call me
Call me at night where did you go?
Where did you go? And did you think of me? It's hard to breath when my heart is sinking
I'm slipping fast as I'm reaching for you
It's gonna hurt 'cause I have been there before
Can't take much more, can't take another night
Without you here beside me I want to review my kisses on every inch of your body
I want to reveal my secrets that only you should know
I feel all this pain inside me that only your lips can make better
I wanna review my kisses so you won't forget that you are mine Don't wanna care more than you do
Don't wanna be the one who's out in the rain
Don't wanna get that call where you sound so cold
So far away, so far away like the distant roll of thunder I want to review my kisses on every inch of your body
I want to reveal my secrets that only you should know
I feel all this pain inside me that only your lips can make better
I wanna review my kisses so you won't forget that you are mine It's a cave in the darkness and I'm lost inside
you
Don't go I want to review my kisses on every inch of your body
I want to reveal my secrets that only you should know
I feel all this pain inside me that only your lips can make better
I wanna review my kisses so you won't forget that you are
So you won't forget that you are mine
