

Take that Pill

Ready Never

I take one just to get me going
Another for my moody morning
And one at work when I feel lonely, if only
There was one for me to get away from here Nothing can stop me Nothing can stop me Wo oh oh oh Wo oh oh
oh Take that pill Take that pill I take one as I'm getting tired
And one when I get way too wired
And now I'm feeling I'm on fire, desire
Everyday I wonder if I will survive I put my hands up in the air until the night stops So just dance on just dance
on
I put my hands up in the air until the night stops So just dance on just dance on
Nothing can stop me Nothing can stop me Wo oh oh oh Wo oh oh oh Take that pill Take that pill I see your lips
and I see ya I see your lips and I see ya
I see your lips and I see ya I see your lips and I see ya
I see you lip I see you lip I see you lips and I see ya Wo oh oh oh Wo oh oh oh Take that pill Take that pill
