

# On Our Way

Christina Aguilera

Me and you, we're different, don't always see eye to eye  
You go left and I go right and sometimes when we even fight  
That don't mean that I won't need a friend, oh  
You and me, we're in this 'til the end, oh I think we're on our way  
Through all the lows and highs, by my side singing  
I think we're on our way  
To better days, better days, oh Let's say we turn the page, move on from all the times  
Should've laughed, not cried, feeling  
What is there more to say?  
I think that we're on our way Together, we'll weather many storms as family  
That bond is forever, it can take almost anything  
The love I feel for you grows everyday, yeah  
The more we get to learn from our mistakes, yeah, yeah I think we're on our way  
Through all the lows and highs, I need you by my side, singing  
I think we're on our way  
To better days, better days, oh Let's say we turn the page, move on from all the times  
Should've laughed, not cried, feeling  
What is there more to say?  
I think that we are on our way Someday soon, I'll need advice  
Hope you're there to shed some light  
And maybe one day, you'll be wanting mine  
And we can, we can be there be for each other I think we're on our way  
I think we're on our way I think we're on our way  
Let's say we turn the page, move on from all the times  
Should've laughed, not cried  
What is there more to say?  
I think that we're on our way I think we're on our way  
Through all the lows and highs, I need you by my side, yeah  
I think we're on our way  
To better days, better days, yeah Let's say we turn the page, move on from all the times  
Should've laughed, not cried  
What is there more to say?  
I think that we're on our way, yeah, ohh No more to say  
No more to say, yeah  
No more to say
