

# She's Like Mercury

[Mark Selby](#)

You wouldn't put poison on your dinner table  
She oughta come with a warning label  
Stand back, you better stand back  
She'll turn your head she's the eighth wonder  
Take a breath boy you're going under like that  
Just like that She's like mercury, she'll burn you up so easily  
Slip away if you try to hold on  
She'll blind you if you stare too long  
Go on believe what you wanna believe  
She's like mercury She's bad for business, quicksilver  
You're gonna love it but it might kill ya  
So long - you're gone  
I was the king heart breaker  
I wasn't strong enough to take her on  
Couldn't take her on She's like mercury, she'll burn you up so easily  
Slip away if you try to hold on  
She'll blind you if you stare too long  
Go on believe what you wanna believe  
She's like mercury I'm gonna pour ya a little luck  
It's on me, drink it up She's like mercury, burn you up so easily  
Slip away if you try to hold on  
She'll blind you if you stare too long  
Go on believe what you gotta believe  
She's like mercury
