

She's The Blade

Sugarcult

Don't you make a move tonight
You can only stagger
Once shes got you in her sight
You're the one shes after
Shes the blade and you're just paper
You're afraid cause shes got closer
You're back-steppin and she's back-stabbing everything in your life
She stole everything your heart desired
Now you want it back
She stole everything your heart desired
Now you want it back
One by one you count the fights
Doesn't even matter
That shes got you by surprise
Misery's your master
Shes the blade and you're just paper
You're afraid cause shes got closer
Your back-steppin and shes out wrecking everything in your life
She stole everything your heart desired
Now you want it back

She stole everything your heart desired
Now you want it back
She stole everything
She controlled everything
She stole everything
She controlled everything
Shes the blade
Shes the blade
Shes the blade and you're the paper
Shes the blade and you're just...
Shes the blade and you're just paper
You're afraid cause shes got you closer
She stole everything your heart desired
Now you want it back
She stole everything your heart desired
Now you want it back
She stole everything
She controlled everything

She stole everything
And controlled everything
