

Take The Long Way Round

Teenage Fanclub

Sunshine every beat when I'm 'round you
Feels like maybe I've been here before
Through the cold days of learning
To the soul days of yearning Take the long way 'round
Take the long way 'round
You know when you need it
Heart begins to clear
Tell me when you've seen it She goes any way the lights are going
She knows there's no meaning to defend
Pull the subway to the station
For that golden lights sensation Take the long way 'round
Take the long way 'round
You know when you need it
Heart begins to clear
Tell me when you've seen it Sometimes you underline destinations
Sometimes you try to find inspiration Take the long way 'round
Take the long way 'round
Take the long way 'round
