

# The Ills

## Mayer Hawthorne

Woo Hoo  
A babys born  
The fathers gone  
Cant live with what hes done  
You know now mamas torn  
She cant afford  
To raise her son You know the ills of this world they can get you down  
You know the ills of this world they can get you down  
But then you get back up Way down in New Orleans  
The city screams  
Theyve gone black and white  
And when the levys broke  
Woo hoo the city float  
And people lost their lives  
You know they needed aid  
They hoped and prayed  
But it was just too late  
And now the familys cried  
They know inside  
Doesnt have to be that way You know the ills of this world they can get you down  
You know the ills of this world they can get you down  
But then you get back up You know the ills of this world they can get you down  
You know the ills of this world they can get you down  
But then you get back up
