

# United Abominations

## Megadeth

Poverty in their kitchens  
Held hostage by oil for food  
Yet their own plates are full of the fat of their lands  
There's no blood on their hands, right Kojo?They promised to tell the truth  
Without leaving a fingerprint  
They will lose the UN one way or another  
The victim, I fear will be us, sisters and brothersThe UN is right, you can't be any more un  
Than you are right now, the UN is undone  
Another mushroom cloud, another smoking gun  
The threat is real, the Locust King has comeDont tell me the truth  
I don't like what they've done  
Its payback time at the United AbominationsA grave and gathering danger  
The decision to attack  
Based on secret intelligence it'll take years  
I fear to undo the failings in IraqYou may bury the bodies  
But you can't bury the crimes  
Only fools stand up and really lay down their arms  
No, not me, not when death lasts foreverThe UN is right, you can't be any more un  
Than you are right now, the UN is undone  
Another mushroom cloud, another smoking gun  
The threat is real, the Locust King has comeDont tell me the truth  
I don't like what they've done  
Its payback timeThe UN is right, you can't be any more un  
Than you are right now, the UN is undone  
Another mushroom cloud, another smoking gun  
The threat is real, the Locust King has comeThe UN is right, you can't be any more un  
Than you are right now, the UN is undone  
Another mushroom cloud, another smoking gun  
The threat is real, the Locust King has comeDont tell me the truth  
I don't like what they've done  
Its payback time at the United Abominations
