

Nature

[Jennifer Castle](#)

Despite all my feelings of life parallel
Nature is happening without my goodwill
I called my friend up and she said it still
Happens to you even when you are ill Out on the highway
It rises the eye
I saw an eagle
Full mouth with the kill flying by No family
No universe
No holy god
No mother earth
Out on the land to either side
A pit as deep as it is wide
And underneath a rolling dime
I lift my skirt for the economy
