

# Shoreline

## submerse

Ever since i was eight or nine  
I've been standing on the shoreline  
    Always waiting  
    For something lasting  
    Loose your hunger, you loose your way  
    Get confused and you fade awayOh this town  
    Kills you when you are young  
    Oh this town  
    Kills you when you are youngI'm not the boy i used to be  
    This town has got the youth of me  
    All eyes turn hollow  
    From the work of sorrowStanding on the paving  
    By the office building  
    They've got so much to do  
    Never time for youWe are shadows  
    Oh we're shadows  
    Shadows in the alleyYou die when you're young  
    You die when you're young  
    You die when you're young
