

# To Our Knees

## Low

And the love we all need  
Was running hard to be free  
It got caught up in the forest  
By the branches on the trees By the creatures of the daylight  
And the beasts of the night  
Then the mountains and the rivers  
Took their toll on its lean It went stumbling down a hillside  
Where it landed on its knees  
On its knees, on its knees  
On its knees and: scene And the love we all need  
Once relented from its speed  
We adored it and abused it  
Til it brought us to our knees
