

# Give Grace

## Rusted Root

Whatever it is you want  
I dont care about that  
But I'll give it to grace  
to fall down on your faceSentimental Rose heres on fire  
all to mend this heart  
all to mend this heartcuz no one knows you  
in this town  
no you wont be  
hanging around  
oh girlall to mend this heart  
all to mend this heartno more pity for the loves that fallen  
the tiger has risen to raise the warning  
lines in the sand dont mean nothing at all  
its all been great it all looks like good  
now im gonna dance like i should  
oh girl where'd you come fromcuz no one knows you  
in this town  
no you wont be  
hanging aroundoh to mend this heart  
we gosince you been out its been harder girl  
black magic thorns  
the flowery walls  
and girl this is our last danceits all been great it all looks good  
now im gonna dance like i should have done  
such a long time ago
