Here, Now

Andrew Simple

These are the best of days
These are the memories we'll hold
We'll hold on to this thing call time that we all share
All that matters is we're together here
Together here

These are the things we'll remember
The love that fills this place year after year
Lay down your cast and gather around
All that matters is we're together now
Together now

Paint me the perfect picture
Just how I knew that it would be
Cold air will make us shiver
But that's why we've got each other

Together here
Together now
