Crown the Liar

Immolation

Believe in the liar
His words will convey
Profound and charismatic
Influence all to his soulTell them what they want to hear
Keep the wolves at bay
Swallow all the truth
And spit deception outTogether we'll pave the way
To his omnipotence
Calming all dissension
Dissuading interventionHiding sanity - strangling reason
Remove his wicked tongue - or face the consequenceDivide and conquer uproot and tear down
The world is his
Provide the cause cause the effect
Create the hatred
Extort our passions extort our strengths
Force our hand
Distort our vision distort your promise blinding gloryUndo the world - unleash its fury
Release our demons - infect us all with your venomWe saw it coming and watched him rise
We did nothing to stop this mess
A fool's kingdom, a fool's king
We raised the liar and crowned the beastThe lives of many on the heels of victory
Will know defeat
He led us blindly so blind in anger
We could not see
The cries of reason so loud their cries
Fell on deaf ears
We'll bear the scars and take the pain
For one more day
