

This Nothin' Town

Jason Aldean

Got us a sunset sinking into a friday night
Got us some beer needs drinking hey and we just might
 Sometimes we gotta make it up as we go
But layin' low ain't all that goes on 'round here
 It might look a little laid back to ya
 But it ain't all just porches and plows
 But don't let that one red light fool ya
 There's always something going down
 In this nothin' town
That old abandoned factory just got the wrecking ball
We threw a party in the parking lot just to watch it fall
 Sometimes we gotta make it up as we go
But laying low ain't all that goes on 'round here
 It might look a little laid back to ya
 But it ain't all just porches and plows

But don't let that one red light fool ya
There's always something going down
 In this nothin' town
 In this nothin' town
 Somebody's backyard
 Some river bank
 Sometimes c'mon y'all
 Yeah that's all it takes
 It might look a little laid back to ya
 But it ain't all just porches and plows
 But don't let that one red light fool ya
 There's always something going down
 In this nothin' town
 There's something going down
 In this nothin' town
