

The Scene

Our Dilemma

The Scene

(Graham Russell, Mark Towner Williams, Cliff Rehrig)It's another lovely day

Are we still so far away

And how can I share it with youIt's not easy to believe

Are we both about to leave

Without ever saying, I do

I still love you(Chorus)Just make me part of the scene

Say we're together, always forever

And everything else in betweenJust say we're part of the scene

I don't want to hear it, I just couldn't bear it

If things weren't as good as they seemYou can say I'm not the one

That a lot of faith has gone

The bridges were never quite crossedEvery grain of truth, we deny or prove

Is somewhere before it gets lost

And is found again(Repeat Chorus)What if these feelings are all in my head

Flying around me in a world of their own

What if there's nothing that needs to be said(Repeat Chorus)Just say we're part of the scene

Say we're together, always forever

And everything else in between

Just say we're part of the scene

Just say we're part of the scene

Just say we're part of the scene
