

# Hi Love

## The Robot Ate Me

standing up is the easy fight  
sitting down is violent  
sometimes the way to change  
starts with silence  
hi love, i need you to make it through  
hi love, what's all this without you  
hi love, i need you to make it through  
hi love, what's all this about you  
hi love, i need you to make it through  
hi love, what's all this about you
