

# Into the Light

## Papa Roach

This is a warning, my final warning, go  
This is a warning, my final warning I got a head full of wreckage and a mouth full of lies  
My mind's in the gutter, I feel like I wanna die  
I'm the king of nothing with a broken crown  
I'm being takin' a beating but I won't back down Free me from myself, shut down my mind  
A pseudo revolution into the light This spear is a weakness and it's wearing me out  
I burn in the sickness, it feels like I'm going down  
And align my affliction and I run from the light  
It's a lowly condition if you're the one tonight Free me from myself, shut down my mind  
A pseudo revolution into the light  
Fuck all this madness, put it aside  
Out of the shadows into the light Free me from myself, shut down my mind Out of the shadows into the light  
Out of the shadows into the light So free me from myself, shut down my mind  
A pseudo revolution into the light  
Fuck all this madness, put it aside  
Out of the shadows into the light Free me from myself, shut down my mind  
Shut down my mind  
Free me from myself
