

# Masquerade Ball

[Pedro Gabriel Amaral](#)

UFO goes around and it falls  
In a waterfall  
I crash my car when I turn to the right  
In a different road  
Takes me a way I've been before  
Brings me life while I am drowning That is the girl that I loathe and I love  
Since I was a boy  
Searching 'round town shopping malls in a store  
For a masquerade ball  
I don't wear a mask because I am  
I'm too weird to be disguised Bye bye little town  
We're all missing you  
Bye bye girl I like  
I will marry you Letters that burn and they run yeah they run  
To the hands of all  
What is so wrong about love for us  
To end in such a hell  
Will explain all of my words  
But don't expect me to be kind
