

# So Long Forever

## Vega 4

I wish I could cry  
Your weather feels numb  
And the morning so bright  
I'm blinded by love So long forever  
So long forever I try to hold on  
As the signal goes out  
And the video fades  
To the sound of goodbye So long forever  
So long I will remember And I wish I could dream  
And I wish I could see your face  
As you came around  
(To call) And your curtain goes down  
And your music plays on  
The same old song forever more And I wish I could  
(Hold)  
And I wish I could hold you tight  
And never let you go So long forever  
So long I will remember  
So long forever  
So long I will remember So long forever  
So long I will remember  
So long so long  
So long
