

Follow Me Down

Golden Animals

I hear you weeping and I hear you moaning
The world unfriendly when you're out on your own
cool your worries cast them aside
keep one eye on the sky till the end of the ride

Cause there will be magic on the mountain for a hollow kid
your never going to change but the past never did
river, river, river com sail me away
Oh follow me down
wow.... follow me down

Go out gently into the wood
The more you think about it the less understood
Ease your hurry slow to a strife
through the trembeling hills
where cannon balls fly

Cause there will be magic on the mountain for a hollow kid
your never going to change but the past never did
river, river, river com sail me away
Oh follow me down
wow.... follow me down (x2)
