

Nursery Rhyme

Meat Puppets

The rabbit hole opened, so in they all went
And the height of the evening was when you said
We got computers inventing the perfect headSo we all put on our gowns
And a truck brought loads of hay
And out of the fog flew a rubber babyAnd we opened up the ground
And shaped the straw and clay
And out of the fog flew a rubber babyThe donkey receivers were happy and free
And they built them a camp by the shiny sea
They got computers invented in just a weekSo we all put on our gowns
And a truck brought loads of hay
And out of the fog flew a rubber babyAnd we opened up the ground
And shaped the straw and clay
And out of the fog flew a rubber babyNow in the beginning they just came and went
And they used to pretend they were heaven sent
We got computers that fix all the rust and dentsSo we all put on our gowns
And a truck brought loads of hay
And out of the fog flew a rubber babyAnd we opened up the ground
And shaped the straw and clay
And out of the fog flew a rubber babyAnd we opened up the ground
And shaped the straw and clay
And out of the fog flew a rubber babySo we all put on our gowns
And a truck brought loads of hay
And out of the fog flew a rubber babyAnd we opened up the ground
And shaped the straw and clay
And out of the fog flew a rubber baby
