

# Tenderest Moments

## Erasure

We go down to a foreign land  
Dive through the clouds  
You hold the guided light  
In your hands This must be all that there is  
Times don't come much more beautiful You could show me places that my eyes have never seen  
I'm following you, where are you taking me to?  
And you could be my angel who just walks out of a dream  
I'm following you, where are you taking me to? I have all faith in you  
And these tenderest moments We circle low  
Embrace the night as she draws us in  
A holy shroud  
A veil to hide our tenderest moments This must be all that there is  
Times don't come much more beautiful You could show me places that my eyes have never seen  
I'm following you, where are you taking me to?  
And you could be my angel who just walks out of a dream  
I'm following you, where are you taking me to? I have all faith in you  
And these tenderest moments This must be all that there is  
Times don't come much more beautiful You could show me places that my eyes have never seen  
I'm following you, where are you taking me to?  
And you could be my angel who just walks out of a dream  
I'm following you, where are you taking me to? I have all faith in you  
And these tenderest moments  
And these tenderest moments
