

Don't Fade On Me

Firehouse

Don't You Fade on Me by Firehouse

Look at our love

It's like a picture book of memories and we don't know how the story ends

When we were young

We lived each chapter of our lives and through it all

We stayed the best of friends

Darlin' turn back the pages and remember yesterday

And mark the place inside your heart

Don't close the book and let our story end this way

When times get hard oh you know I need you to be strong

Baby don't you fade on me

We've been together so long and now you're a part of me

We've been side by side through thick and thin can't throw all that away

You've got to hang on baby don't you fade on me

Take a look at us now

We've traveled every road together but we don't know where the journey's done

Just when we think we've reached the final destination

We come to find we've only just begun

Darlin' you're never lost if you just let love find the way

When times get hard and you know I need you to be strong

Baby don't you fade on me

We've been together so long and now you're a part of me

We've been side by side through thick and thin can't throw all that away

You've got to hang on baby don't you fade on me

Baby don't you fade on me

We've been together so long and now you're a part of me

We've been side by side through thick and thin can't throw all that away

You've got to hang on don't you fade

Baby don't make that mistake

Don't you fade on me
