Between Man & Machine (feat. Bass Inc. Instinct)

Wes Mex

Who's the creator
who's the created
when the timeline's so streched
we can't say for sure

Who's the one appeared
for the first time?
maybe I'm right
maybe I'm not
maybe I'm a robot

full of wires
watch my inner side
is like

a bound bouncing
between flesh,
microchip
neurowebs, flywheels,
jaws 'n' controls
which are useless to list
since

it's not easy
to explain
the kind of train
I boarded

I still miss something
and I suspect that
is the link
that exists
between man and machine

and I still miss something
all the passengers
are lookin at me
as
if I'm a sort of dumbass

I don't really get why's all this happening

the conductor's complaining
about my simple human being
so I don't feel completely at ease
'til I found the reason of my incompleteness

I still miss something
and I suspect that
is the link
that exists
between man and machine

Who's the creator
who's the created
when the timeline's so streched
we can't say for sure
