

Roswell 47

Hypocrisy

Their freedom was taken away as they crashed
To be a project of search
The experiment will make sure it won't last
All expect starlight once The ascent alien ship was shot at
Because national security was in jeopardy
They say a weather balloon crashed, so we know it's bullshit
We have the right to know
What really happened in, Roswell 47 Shipping back pieces to a hangar
To slowly put it together
To find new weapon technology
And maybe answer our dreams forever The fatal afraid of spread disease, chaos and confusion
The energy physics long will be worth
That's why we have the right to really know
What happened, Roswell 47 They picked him as the offers in play
Might try to really happen
They lost control and crashed in Roswell 1947 1947
