Please Try to Understand

The Stereo

what could be wrong with me
even with all the years you're all I need
what could be wrong with me
what could be wrong with you
you're stubborn
or do you care about what you do
what could be wrong with you
I thought I knew you well but I was wrong
you don't care at all
is there a reason why?
if you would try you might decide to go
and you can do anything if you want to
and you can be all of that if you want to
and you can say anything
but you can't say I'm wrong
when you won't even listen
