

Young and Menace

Fall Out Boy

[Verse 1]

We've gone way too fast for way too long
And we were never supposed to make it half this far
And I lived so much life, lived so much life
I think that God is gonna have to kill me twice
Kill me twice like my name was Nikki Sixx
I woke up in my shoes again but somewhere you exist singing[Chorus]
Oops I, did it again, I forgot what I was losing my mind about
Oh, I only wrote this down to make you press rewind
And send a message that I was young and a menace[Verse 2]
Woke up on the wrong side of reality
And there's a madness that's just coursing right through me
And as far as the time, far as the time
Not sure I'm there yet but I'm searching out the ride[Chorus]
Oops I, did it again, I forgot what I was losing my mind about
Oh, I only wrote this down to make you press rewind
And send a message that I was young and a menace[Bridge]
If I am off the deep end
I'm just here to become the best yet
I'm just here for the psych assessment
I'm just here for the... for the... fall[Outro]
We've gone way too fast for way too long
