Attention Span

Sicko

My attention span has gotten so pathetic
and I can't believe I let it get so short
I can't concentrate
Everything is just a series of jump cuts
it's enough to drive you nuts
until you just get used to itIt's fucking up my sense of vision
could you repeat that once again
I'm stuck on hyperactive rhythm
is it affecting my attention span?My attention span has all but disappeared
I am everything that's feared
and is finally coming true
yeah that's typical to blame it on T.V.
don't accept responsibility for anything you do
